About Company:

ProRelix Research is a Clinical Research Organization (CRO) offering several professional services and resources for drug development and analysis on the industry to support clinical research. We specialize in a wide range of tools and resources to aid patient and investigator recruitment, remain current with industry trends and business practices, and strengthen organizational procedures. Our strong database and a fine assortment of industry resources make us an adept organization. In a highly fragmented industry, we are one of a group of organizations with the capability and expertise to conduct clinical research. We have the operational flexibility to provide drug development services on a stand-alone basis or as part of an integrated full service solution.
